

ARCUS LIBRARY STAFF APPLICATIONS

The Arcus solution is a powerful, inovative RFID solution for libraries. Functionality is browser based and simple to use.

Any station can be used for any function and easily moved to different locations. A web interface allows access from anywhere and as RFID stations are not locked to a specific function can be used for any purpose from Self Service to Conversion, and staff Workstation.

Arcus comes with many applications including the following:

- Workstation:** A keyboard wedge for passing item information directly to the LMS client
- iCheckout:** The Arcus Self Check software to loan items.
- iCheckin:** The Arcus Self Check software to return items.
- Returns:** Used to monitor return chute returns. You can watch items returned as they happen from anywhere.
- Conversion:** Conversion is used to add new RFID items and delete old items.
- Security Gates:** Displays details of items seen by security gates including alarms.
- Stocktake:** Database driven stocktake delivers stocktake reports automatically updated with LMS data.
- Reports:** Powerful Live statistics including circulation by station, conversion, and people counting
Configuration for all stations is managed and visible from anywhere online, updates are automated

Arcus as a managed service means better performance, easier support, and greater visibility. Adilam updates Arcus remotely so local support isn't necessary for updates. Arcus remembers item details for future reference and uses the power of the cloud to improve performance, read rates, and security.
